Inferior and broken-down animals.....	50 to 100
Choicest carriage and saddle animals.....	350 to 500

HORSES (Continued)

TORONTO MARKET—MARCH 3, 1911

Reports of increased activity at country points embody about all there is to tell of the horse trade. A good many loads have recently left for the West, and from Winnipeg comes reports of improved trade, with receipts readily disposed of. At the same time, buyers here are still in no great hurry to start westward with their purchases, arguing that as westerners themselves are in no hurry to buy, and as picking horses up in Ontario is no longer easy, they can afford to hold their goods at this end as well as at the other. Most of the shipping so far has been done by regular shippers, the larger number of men in the business in a small way holding back a little.

These, however, have been active buyers at country points in Ontario.

Several Western men have selected and bought carloads of pure-bred Clydesdale mares, for which there is an active western demand. Country trading amongst farmers themselves is a prominent feature of the trade, many farmers looking for good horses either speculatively or for their own use.

City trading has been quiet. But at the horse exchanges reports of improved tone to business are in order, at steady prices. Winnipeg horsemen report prices for drafters from 1,300 to 1,600 lbs. at from \$225 to \$300, for general purpose and farm mares or geldings of from \$125 to \$200, delivery horses at from \$150 to \$250, and ordinary workers at from \$50 upward.

Montreal reports a fairly active horse inquiry, although the turnover has not been large. Local trade has been taking numbers, while outside demand has generally been looking for lower prices and, failing that, for cheaper grades. Draft horses of from 1,500 to 1,700 lbs. are quoted at \$300 to \$350, lighter draft at from \$225 to \$300, and light horses at \$100 to \$200 each. Choice carriage and saddle horses command from \$250 to \$500 each.

There is more vim and snap to the Chicago horse market than for some time. Drafters are wanted, and delivery and express horses are in demand, while packers are in the market for wagon horses. Farm demand has slackened somewhat, but eastern requirements are being felt, and it has a disposition to call for better stock. Clearances of offsprings at the stockyards and sale barns have been in order, at steady prices.

MONTREAL MARKET—MARCH 1, 1911

Horses.—Dealers report a good demand for high-grade horses for the local market. Prices continue steady.

HORSES (Continued)

CHICAGO MARKET—MARCH 8, 1911

Supply of horses is running considerably heavier than a year ago and the market is on very soft bottom. Trade is brisk, however, and it is a difficult market to gauge owing to diversity of individuality. Poor horses get least demand. Supply is badly mixed and carries a little of everything, quality, on the whole, being nothing to brag about. Country buyers are picking up most of the nondescript stuff at a range of \$75 to \$135, while there is some demand from the same source for horses suited to livery work. Chunks of the better class, selling at \$325 to \$375 per pair, are also going to the country. Draft mares are being bought liberally on farm account, carloads averaging 1,450 pounds or thereabouts, having been taken out around \$250 per head. Lighter mares are realizing less money, but are also wanted. There is a scarcity of New York drafters, scaling from 1,700 pounds up, in strong working condition, and they command \$275, or more, a load averaging 1,800 pounds being taken out this week at \$300. The trend appears to be toward a lower level, but a lot of horses are being cleaned up this week and better clearances are effected than expected.

NEW YORK MARKET—MARCH 11, 1911

Demand was moderate for all types of useful horses last week and prices were rated steady to firm. Harness horses were quiet and unchanged.

BOSTON MARKET—MARCH 11, 1911

The horse market was more active than for some weeks past, and on general sales higher values were noted, with an improved demand. Dealers are paying nearly \$25 per head higher on consignments received of fresh country horses, which have advanced steadily during the last three weeks, but the same horses will not command the same advance here, as the season is more backward and the demand, although improved, is not sufficient to admit of as sharp a rise in values. The bulk of the trade was in heavy draft horses for use about the city and in farm horses shipped out into the country.

HORSES (Continued)

CHICAGO MARKET—MARCH 15, 1911

Horse supply is generous, but the market is active and a good clearance is being effected right along. Eastern buyers are busy, more representatives from that section being at the ringside than in several months past. Boston is taking good 1,350–1,500 pound chunks, paying \$200–\$250, while \$150–\$175 is paid for a cheaper grade without haggling. New Jersey demand is strong and calls for better quality than heretofore. New England buying is on a broad scale. Classy wagon horses, weighing around 1,250 pounds are being taken for city delivery service. This demand calls for a shapely class of expressers. Everything in the shape of a good work horse finds a buyer. Big expressers of the old-fashioned sort are decidedly scarce. Farm mares are selling with alacrity. Country buying for livery service is on a broad scale. Minnesota and the Dakotas have filled numerous orders during the week. Prices are holding on about the same basis. Common workers may be bought as low as \$70, while farm mares are selling largely at a range of \$185–\$265 according to size, quality and breeding.

NEW YORK MARKET—MARCH 18, 1911

Trading was rather quiet at the large auction markets last week, and prices generally steady; choice heavy drafters scarce and firm with some few offerings exceeding quotations.

BOSTON MARKET—MARCH 18, 1911

Trade was the best for this season. Higher values were obtained and demand showed a general improvement in activity on all classes of commercial horses. The market was strong and on all horses of quality the advance averaged about \$10 per head higher than last week's quotations. The country trade was brisk, and local active, with more call for horses of more medium weight than before. Harness classes were entered in limited amounts, with a great scarcity of high-class driving horses. In this class, if a buyer can get what he wants, fancy prices are paid willingly. There were more inquiries about the sale stables for more ordinary driving horses, but the season for this class of horse has not fairly started, such horses being wanted mostly for summer resorts.

TORONTO MARKET—MARCH 17, 1911

Horse trade is on full swing, and nearly every centre is sending out its carlots of horses on western account. From Toronto there have gone forward big consignments, and prices have shown a tendency to stiffen.

Western shippers display a tendency to buy as many pure-bred mares as possible, and most of the loads include a number of these.

HORSES (Continued)

MONTREAL MARKET—MARCH 16, 1911

Local dealers report that business has recently been confined to local purchases altogether. Prices steady.

CHICAGO MARKET—MARCH 22, 1911

A lot of horses are coming, but an outlet is found for them and a good clearance is effected weekly. Trade opened this week with a brisk tone and an army of buyers at the ringside. Classy wagon horses are prime favorites and decidedly scarce. Good mares are wanted, and, if shapely with abundance of draft blood, they do not need to weigh over 1,350 pounds. The retail market is lively, sales of heavy drafters being made at \$625 to \$650 the pair, one horse at \$350, another at \$325 and several around or above \$300. Chunks on the southern order and drivers with plenty of size sell readily. Farm stuff of the cheap kind is selling as low as \$70, with good mares up to \$265.

NEW YORK MARKET—MARCH 25, 1911

There was a better demand for all grades of horses last week and prices were full steady. Good second-hand horses were the leading sellers, with general sales fair to good.

TORONTO MARKET—MARCH 24, 1911

Horse trade is active, and western shipments have of late been numerous. Sales at the other end are reported to be quick and satisfactory, with a good big share of cash buying. Buyers have scoured Ontario pretty well, and have lifted most of the horse flesh that can be pried loose at present.

American markets are reported upon as active, but with prices generally somewhat lower than Canadian quotations are.

MONTREAL MARKET—MARCH 23, 1911

Supplies light, and demand only moderate; prices steady.

LIVE CATTLE

Comparative prices of Live Cattle, two quotations each month for the year 1910, in New York, Buffalo, Montreal, Chicago, Toronto and Winnipeg (see pages 15 and 16), and for each week from December 9th, 1910, to February 24th, 1911 (see page 17), and for each week from March 3rd, 1911, to April 28th, 1911 (see page 18).

Summary of page 38.

BARLEY

Memorandum for the Honourable the Minister of Agriculture re Production and Prices of Barley in the United States and Canada.

Production, Exports and Farm Values.

Year Ending Dec. 31		Production Bushels	Average Farm Price Cents per Bushel	Exports Bushels	Value of Exports \$
1906	United States	178,916,484	41.5	14,528,245	7,363,805
1907	"	153,597,000	66.6	5,443,913	3,621,361
1908	"	166,756,000	55.4	5,671,013	4,795,074
1909	"	170,284,000	55.2	4,589,397	3,281,506
1910	"	162,227,000	57.8	8,262,961	4,705,321
1910	Canada	45,147,600	47.4	1,638,808	884,773

In considering the large production in the United States it must be remembered that the bulk of their crop is fit for feeding only and that the production of malting barley has been steadily declining. In this connection the U. S. Tariff Board (Document No. 849 on Reciprocity with Canada February 28th, 1911) in their report to the President, make the following statement:—

“Our best malting barleys are grown in the extreme West. A small quantity of excellent barley is also grown in the Rocky Mountains region. The Barley of the Northeast is of an inferior quality and is grown largely for feeding purposes. The barley of California is not shipped to the domestic markets in the East except when the price is unusually high. What is not used locally is exported.

“In most of our barley-producing regions there has been an apparent decline in the quality of the barley raised as a larger proportion has been fit only for feeding. This is said to be due to carelessness in seed selection, and to failure to maintain soil fertility.

“While the amount of barley produced has increased enormously, an increasing proportion of the crop is undesirable for malting.”

BARLEY (Continued)

The actual situation in the United States is best shown by the following table. It is seen that only five States are important producers of malting barley in the region east of the Rocky Mountains. Four of these States show a marked falling off, 22,000,000 bushels in the crop of 1910 from the crop of 1909, or a loss of 21.4 per cent, while if comparison is made with the ten-year average a loss of 20.9 per cent is apparent. The average yield per acre in 1910, except in the State of Iowa, is less than the ten-year average.

Table 18—Statistics of Barley Production for 1910

(From the Brewers' Journal, Nov. 1, 1910).

States	Production
Wisconsin	22,429,000
Minnesota	28,142,000
Iowa	13,420,000
South Dakota	18,582,000
North Dakota	5,626,000
Total	88,199,000

"The shortage of malting barley has become more and more pronounced every year, and prices have steadily advanced.

Farm Values

According to the first table given in this memorandum the average farm value of barley in the United States in 1910 was 57.8 cents per bushel compared with 47.4 cents in Canada. In New York State, however, the average farm value was 70 cents, in Wisconsin 64 cents and in Minnesota 60 cents, while in Ontario it was 53 cents and in Manitoba 39 cents. Ontario and Manitoba are the chief barley growing Provinces in Canada, producing 34,553,000 bushels in 1910 out of a total of 45,147,600 bushels for all Canada.

BARLEY (Continued)

WHOLESALE PRICES OF MALTING BARLEY, 1906 to 1909

Document No. 849 by the U. S. Tariff Board, already referred to, quotes the following wholesale prices of Malting Barley (pages 103 and 107) :

Average price in cents per bushel

Dates	Cincinnati Extra No. 3 Spring	Milwaukee Extra No. 3	Toronto Ontario No. 2	Winnipeg Western Malting
1906—January	55½	49	46½	38
April	57½	54½	51	38
July	57½	50	51	43
October	56½	50½	51½	40
1907—January	57	53	50	42
April	73	70½	52½	42
July	91	66	54	54
October	1.10½	91½	67½	69
1908—January	1.14	95	71½	46
April	1.04	77	60	49
July	..	60½	54	44
October	69	61½	57½	54
1909—January	68½	64	54	49
April	71½	66	64½	57½
July	75½	68½	62½	58
October	65½	71	55½	45½

Under the heading "The Canadian Situation," the report of the U. S. Tariff Board makes the following reference to barley production in Canada.

"Eastern Canada, including Ontario, has long been noted as being one of the finest barley-growing regions in the world, and before the present duty was placed upon it large quantities of this Ontario barley were malted in the United States.

"Next to Ontario in importance as a barley-producing Province comes Manitoba, but for a number of years barley production in Manitoba has been practically stationary. The soil and climate of Western Canada are so favourable that its barley is sold at a premium on English markets, but under present conditions greater profit is apparently found in other crops."

BARLEY (Continued)

The following statement shows the Wholesale Price of Malting Barley, at Minneapolis, Buffalo, Milwaukee, Toronto and Winnipeg each week from July 6th, 1910, to April 12th, 1911. (Quotations from the Northwestern Miller, Minneapolis, and the Grain Growers' Guide, Winnipeg).

NOTE—In each case the London quotation is the average for the month.

NOTE—No records available for Buffalo, Detroit and Minneapolis markets, but during the last five years there has been no appreciable difference between the Detroit and Chicago markets.
